

**McCONKEY**

# rEarth™

It starts with a bottle.

### Introducing rEarth,

McConkey's new line of 100% recycled plant containers made from water bottles (rPET).

rEarth is engineered to be affordable, durable, and attractive, and is a viable alternative to polypropylene and styrene containers. And because it's made from the same material as water bottles, it can easily be recycled curbside—over and over again!\*

**rEarth**<sup>TM</sup>  
It starts with a bottle.

## How it works

**1** Bottles are brought to a recycling facility...

**2** ...where they and other curbside plastics are shredded into flakes...

**3** ...which are melted down and formed into plant containers!

## 1020 True Packs

True 1020 (10" by 20") flat sizes offer same or higher soil volume with more shelf facings and lower costs than traditional (11" by 21") sizes. Our rEarth 1020 True packs are stiff, strong and tear-resistant—plus, they're completely curbside recyclable!\*
